ALUMINUM COMPANY OF CANADA, LIMITED

and Subsidiary Companies

Notes to Financial Statements

1. Principles of Consolidation:

The consolidated financial statements include the accounts of the Company and its subsidiaries (which are all fully owned) comprising Alumina Jamaica Limited; Chaguaramas Terminals Limited; Demerara Bauxite Company, Limited; Kitimat Terminals Limited; Newfoundland Fluorspar Limited; Saguenay-Kitimat Company; Saguenay Shipping Limited; Saguenay Shipping (U.K.) Limited; Saguenay Terminals Limited and The Roberval and Saguenay Railway Company.

All intercompany items and transactions, including profits in inventories, have been eliminated.

Accounts, other than Canadian currency accounts, included in the consolidated balance sheet are translated into Canadian dollars at rates of exchange at 31st December 1959, except that (a) inventories, investments, fixed assets and related reserves are at rates determined at dates of acquisition, and (b) debts not maturing within one year are at rates current at dates of issue except that the first mortgage 3½% sinking fund bonds, due 1974, payable in United States currency, are stated on a dollar for dollar basis.

2. Inventories of Aluminum, Materials and Supplies:

Inventories, as summarized below, are stated at lower of cost or market.

	1959	1958
Aluminum	\$ 22,858,895	\$ 30,787,708
Raw materials	54,906,343	57,221,962
Supplies	12,042,047	13,191,594
	<u>89,807,285</u>	<u>101,201,264</u>
Less: Partial payments against aluminum under contracts for delivery at customer's option	14,621,123	7,293,417
	<u>\$ 75,186,162</u>	<u>\$ 93,907,847</u>

	1959	1958
Land and water rights	\$ 34,388,802	\$ 34,007,224
Mineral properties, rights and development	9,450,340	8,647,368
Buildings, machinery and equipment	1,115,992,153	933,921,298
Uncompleted facilities	46,286,807	47,609,149
	<u>1,206,118,102</u>	<u>1,024,185,039</u>
Construction work in progress	28,240,644	170,816,683
	<u>\$1,234,358,746</u>	<u>\$1,195,001,722</u>

The expenditure for uncompleted facilities represents the cost of certain smelter facilities in British Columbia, the completion of which has been suspended.

Capital projects envisaged for the next few years are presently expected to involve the expenditure of about \$45 million during 1960.

4. Depreciation Policy:

Canadian Income Tax regulations permit the use of the diminishing balance method of calculating capital cost allowances and additional allowances may be claimed on property in respect of which certificates have been obtained from the Minister of Defence Production. These additional allowances, of which some \$14 million remains available to the Company, as well as the diminishing allowances, apply to facilities prior to completion as well as to facilities in use. Certain non-Canadian subsidiaries, too, are permitted by regulations to claim capital cost allowances that exceed straight-line depreciation.

The Company and its subsidiary companies follow the policy of providing only for straight-line depreciation in their accounts. Whenever, in respect of any year, allowances utilized for determining that year's taxes exceed straight-line depreciation the resulting reduction in current income taxes is charged to income and credited to a Reserve for Future Income Taxes. Whenever in a subsequent year allowances so utilized fall short of straight-line depreciation, an appropriate portion of the reserve is transferred back to income. The reserve is similarly employed in the case of other items of a material nature not charged to income in the same year as utilized for tax purposes.

Straight-line depreciation, as recorded in the accounts, includes depreciation on all completed facilities and from 1st August 1958 includes depreciation at full rates on certain facilities in British Columbia (see note 3), the completion of which has been suspended.

5. Debt to Aluminium Limited — Parent Company:

The remaining indebtedness to Aluminium Limited of Alumina Jamaica Limited, a subsidiary acquired from Aluminium Limited in 1958, of \$23,880,000 is payable at a rate no faster than Alumina Jamaica Limited's cash generation, presently estimated at \$15,000,000 in 1960.

Pursuant to the provisions of the 4½% sinking fund debentures, due 1980, approximately \$133 million of earned surplus at 31st December 1959, subject to certain reservations, is not available for payment of cash dividends on the common stock.

8. Operating Revenues:

In 1959, operating revenues were increased by the inclusion of power sales amounting to \$4 million, whereas in prior years, power sales were deducted from cost of sales.

9. Commitments:

A subsidiary company, Saguenay Shipping Limited, has charter hire commitments amounting to \$25.7 million in 1960 (\$30.3 million paid in 1959), \$21.2 million in 1961, \$16.3 million in 1962, \$10.7 million in 1963, \$6.2 million in 1964, \$4.2 million in 1965 and lesser amounts up to 1974.
